Exam : **C_TAW12_750**

Title : SAP Certified Development Associate - ABAP with SAP NetWeaver 7.50

Vendor : SAP

Version : V12.75

NO.1 Enhancement definitions and implementations can be displayed in the Enhancement Information System.

A. True

B. False

Answer: A

NO.2 What is the difference between SAP Basis and SAP NetWeaver?

A. There is no difference; the name change was driven by marketing alone.

B. All versions of SAP NetWeaver include the ability to handle HTTP requests.

C. All versions of SAP NetWeaver require the use of Unicode.

Answer: B

NO.3 What are the declarative statements used to define the selection? Select all that apply.

A. None of the above

B. PARAMETERS

C. SELECT-OPTIONS

D. SELECTION-SCREEN

Answer: B C D

NO.4 Repository objects are client-specific.

A. True

B. False

Answer: B

NO.5 The system class CL_ABAP_MATH contains constants for maximum and minimum values for the numeric data type

A. False

B. True

Answer: B

NO.6 The software component for a customer package can be...

A. HOME

B. Any SAP software component (i.e., SAP_APPL, SAP_BASIS, SAPJHR, etc.)

Answer: A

NO.7 Subclasses inherit all the components of the parent class.

A. False

B. True

Answer: B

NO.8 The dispatcher handles all communication between users, work processes, and other (external) systems.

A. False

B. True

Answer: A

NO.9 You can define search helps and parameter IDs for a data element.

A. False

B. True

Answer: B

NO.10 In a local class, it is possible to declare an instance constructor in all visibility sections of the class.

A. False

B. True

Answer: B

NO.11 Code within an explicit enhancement point can be enhanced but cannot be replaced.

A. True

B. False

Answer: A

NO.12 To generate the function modules for a lock object for a custom table (ENQUEUEJlock_object] and DEQUEUEJlock_object]), which tool would you use?

A. Function Builder (Transaction SE37)

B. General Table Maintenance Dialog (Transaction SE54)

C. ABAP Dictionary (Transaction SE11)

D. Text Elements (Transaction SE32)

E. Reuse Library (Transaction SE83)

Answer: C

NO.13 The addition NO-EXTENSION for SELECT-OPTIONS will allow only one line in the selection table.

A. True

B. False

Answer: A

NO.14 Internal tables can also be modified after executing the READ statement with the addition ASSIGNING. (S.
204) {1 Richtig}

A. False

B. True

Answer: B

NO.15 Which actions release a database lock (with a default value for _SCOPE)? Select all that apply.

A. An /n in the command field

B. The display of a dialog message type E

C. ENQUEUE_<lock_object>

D. A call to a function module

E. DEQUEUE_<lock_object>

F. COMMIT WORK

G. A CALL TRANSACTION / A SUBMIT (Sepeperat)

H. The display of an SAP screen

I. The display of a dialog message type A

J. ROLLBACK WORK

Answer: A E F I J

NO.16 Identify the ways to map context structures. Select all that apply.

A. Dynamic context mapping

B. Direct context mapping

C. External context mapping

Answer: B C

NO.17 You cannot use the INSERT statement to insert lines into a standard internal table.

A. False

B. True

Answer: A

NO.18 You can use the APPEND statement to fill a sorted internal table.

A. False

B. True

Answer: B

NO.19 You must call a method to actually display the contents of the display table after you create an ALV

A. True

B. False

Answer: A

NO.20 How can Unicode checks be made? Select all that apply. (S. 365) {2 Richtig}

A. Only in a Unicode system or as part of a conversion to a Unicode system

B. In any system (after release 6.10) by specifying the program has Unicode checks active

C. By running Transaction UCCHECK

D. Cannot be enforced

Answer: B C

NO.21 A development object can be assigned to only one change request.

A. True

B. False

Answer: B

NO.22 Each component has an interface; of what does this interface consist? Select all that apply.

A. Interface controller

B. Interface view

C. Interface context

Answer: A B

NO.23 Which of the following is a true statement? Select all that apply.

A. A standard table should always have a unique key.

B. A sorted table can have a unique or a non-unique key.

C. A hashed table should always have a unique table key.

Answer: B C

NO.24 Subroutines provide which types of parameters? Select all that apply.

A. Output

B. Return values

C. Exceptions

D. Input

E. Input/output (changing)

Answer: A E

NO.25 At most, a menu bar can have 10 menus. (S. 411) {1 Richtig}

A. False

B. True

Answer: A

NO.26 One of the prerequisites for the replacement object is that the structure type defined for the CDS view should match the structure of the database table

A. False

B. True

Answer: B

NO.27 Which of the following is true? Select all that apply. (S. 105) {2 Richtig}

A. The repository objects and cross-client customization objects are recorded in a task belonging to a local change request if there is no consolidation route leading from the current system defined in the Transport Management System for the transport layer.

B. The repository objects and the cross-client customization are recorded in a task belonging to the transportable request if the consolidation route is defined in the Transport Management System.

Answer: A B

NO.28 The READ statement with the addition BINARY SEARCH for a sorted internal table is better for performance.

A. False

B. True

Answer: A

NO.29 Authorizations are handled automatically during access to the database interface to restrict data access of the user.

A. False

B. True

Answer: A

NO.30 Explicit enhancement points and sections are defined by the SAP application programmer.

A. True

B. False

Answer: A

NO.31 The READ-ONLY attribute cannot be addressed outside the class.

A. False

B. True

Answer: A

NO.32 Each work process... (select all that apply.)

A. Can only make database changes within a single database LUW.

B. Is independent of other work processes

C. Uses a pool of database connections established when the SAP NetWeaver AS for ABAP started.

D. Uses a database connection to a work process established when the SAP NetWeaver AS for ABAP started.

E. Can make database changes spanning multiple database LUWs

Answer: B C D

NO.33 Which of the following is a true statement? Select all that apply.

A. Repository objects and cross-client customization objects are assigned to the workbench request.

B. All transportable objects have to be assigned to a package.

C. Inactive objects can be transported.

D. Local repository objects can be transported

E. Client-specific customization objects are assigned to the customizing '-' request

Answer: A B E

NO.34 Which of the following are true statements? Select all that apply. (S. 342) {3 Richtig}

A. You can also select predefined data types to define the data type of the data element.

B. Field labels are defined for the domain

C. Reference data types can be used to define the data type of the data element.

D. The technical attributes of the data element can be defined by a domain, '-' that is, the data type, the field length, and the number of decimal places.

Answer: A C D

NO.35 You can call the constructor method directly.

A. . True

B. False

Answer: B

NO.36 Which statements are true about a class that has granted friendship to another class? Select all that apply.

A. The friend has access to private attributes.

B. The friend has access to public attributes.

C. All classes that inherit from the friend (subclasses) also have the same '-' access.

D. The friend has access to protected attributes.

E. All classes the friend has granted friendship access status to also have the '-' same access.

Answer: A B C D

NO.37 Which of the following statements are correct? Select all that apply.

A. The SELECT-OPTIONS statement creates an internal table with a header line. '-' The internal table is also known as the selection table.

B. You can only specify default values for the LOW and HIGH fields of the *-I SELECT-OPTIONS input field.

C. The structure of the selection table created with SELECT-OPTIONS has four *-I components: SIGN, OPTION, LOW, and HIGH

D. You can use the addition NO-DISPLAY to hide the input field on the selection '-' screen

Answer: A C D

NO.38 How would you find out if an application program offers a program exit? Select all that apply.

A. Look for a customer exit in the SAP reference IMG within an application ^ Uarea

B. Use the Application Hierarchy

C. Search for the character string CUSTOMER-FUNCTION

D. Use the Repository Information System

Answer: A B C D

NO.39 The valid value for a decimal floating point number of type decfloat34 is a number between 1E6145 and

-1E-6143for a negative number, 0, and +1E-6143 to 1E6145.

A. True

B. False

Answer: A

NO.40 One of the prerequisites for the replacement object is that the structure type defined for the CDS view should match the structure of the database table

A. False

B. True

Answer: B

NO.41 A watchpoint stops program execution every time the condition specified is met
A. False
B. True
Answer: A

NO.42 An SAP LUW differs from a database LUW in that it allows for multiple screens to be processed.
A. True
B. False
Answer: B

NO.43 You cannot use the LIKE statement to define an attribute in a class.
A. True
B. False
Answer: B

NO.44 The Internet Communication Manager (ICM)...
A. Allows the ABAP stack and the Java stack to exchange data.
B. Allows SAP NetWeaver Application Server to process HTTP requests.
C. Replaced SAP ITS.
Answer: B

NO.45 The OCCURS statement is required to define an internal table with a header line.
A. False
B. True
Answer: A

NO.46 Which type of view uses an inner join in a search help?
A. Maintenance view
B. Database view
C. Help view
Answer: B

NO.47 What is the default length of the type C data type?
A. 1
B. 10
C. 1-65535
Answer: A

NO.48 Which of the following statements regarding the event AT SELECTION-SCREEN ON HELP-REQUEST FOR <FIELD> is correct?
A. None of the above.
B. This event will display self-defined (F1) help for the input field programmed in the event block and

will override any help possibly defined in the ABAP Dictionary for the field.

C. This event will display (F1) help for the input field on the selection screen.

Answer: C

NO.49 Identify the types of layout managers. Select all that apply.

A. reeLayout

B. RowLayout

C. MatrixLayout

D. FlowLayout

E. GridLayout

F. ColumnLayout

Answer: B C D E

NO.50 All Open SQL commands allow processing on multiple rows.

A. False

B. True

Answer: B

NO.51 What is a plug? Select all that apply.

A. Can be assigned to multiple views

B. outbound, or both

C. Can be defined as default inbound

D. Can be defined as outbound controlling multiple inbound plugs

E. Can be defined as an exit

F. Forms the basis of navigation within a Web Dynpro

G. Can be defined as inbound and be controlled by multiple outbound plugs

H. Can be defined as a startup

Answer: E F G H

NO.52 The ALV was introduced with ABAP object-oriented capabilities in release 4.5A.

A. False

B. True

Answer: B

NO.53 When you define local classes in ABAP, which syntactical sequence must you follow?

A. PUBLIC SECTION, PROTECTED SECTION, PRIVATE SECTION

B. The order doesn't matter

C. The order is handled automatically.

D. PRIVATE SECTION, PROTECTED SECTION, PUBLIC SECTION

Answer: A

NO.54 The BINARY SEARCH addition cannot be used with the READ statement for the HASHED table.

A. False

B. True

Answer: B

NO.55 Where should the labels for fields be stored?

A. Data element

B. Structure

C. Field

D. Domain

E. Table

Answer: A

NO.56 A transparent table can include a deep structure

A. True

B. False

Answer: B

NO.57 When included in a structure, which elementary field types allow the structure to be considered a character-type data object? Select all that apply. (S. 365) {4 Richtig}

A. X

B. C

C. D

D. STRING

E. F

F. XSTRING

G. T

H. I

I. N

Answer: B C G I

NO.58 You can use a table with a header line for object-oriented programming

A. True

B. False

Answer: B

NO.59 A selection screen can only be defined in an executable program.

A. False

B. True

Answer: A

NO.60 Each work process is assigned a type of task that can be performed. Which statements related to this are true?

Select all that apply.

A. All work processes communicate with the dispatcher.

B. All work processes communicate with the database.

C. A work process can communicate directly with an external system through '-' a Remote Function Call

D. It is possible to have multiple enqueue work processes on an SAP NetWeaver Application Server.

E. It is possible to have multiple spool work processes on an ABAP application '-' server

F. All work processes have the same structure.

G. To switch a work process type requires a restart of the SAP NetWeaver AS for *-I ABAR

Answer: A D E F

NO.61 Which of the following statements about the Object Navigator are true? Select all that apply. (S 105.) {4 Richtig}

A. Screens can be displayed and edited in the Object Navigator.

B. You can create BAdl implementations in the Object Navigator.

C. ABAP programs can be displayed and edited in the Object Navigator.

D. Menus can be displayed and edited in the Object Navigator.

E. The ABAP Dictionary can be maintained in the Object Navigator

F. You can create customer projects (Transaction CMOD) in the Object Navigator.

Answer: A C D E

NO.62 What does a non-exclusive debugging mode mean? Select all that apply.

A. Debugging is not possible for conversion or field exits

B. Owing to the commit, inconsistent datasets can occur in the database.

C. Debugging is not possible between the statements SELECT and ENDSELECT '-' because the database cursor needs to be closed using a COMMIT.

D. Someone else is debugging the same source code

E. It may be used anywhere in the landscape.

F. A roll-out is forced in the application after each Debugger view

Answer: A B C F

NO.63 What is the default length of the type P data type?

A. 1

B. 8

C. 1-16

Answer: B

NO.64 What is variable-length structure called?

A. Nested structure

B. Deep structure

C. Flat structure

Answer: C

NO.65 A data object is concretely defined by means of the data type and occupied memory. It contains data with which ABAP programs work at runtime.

A. True

B. False

Answer: A

NO.66 SAP enhancements for customer exits are managed by which transaction?

A. Transaction SMOD

B. Neither transaction listed here

C. Transaction CMOD

Answer: A

NO.67 An internal table can have at most 15 secondary keys.

A. False

B. True

Answer: B

NO.68 The class constructor method is called automatically when you access the class for the first time.

A. True

B. False

Answer: A

NO.69 The valid value for a decimal floating point number of type decfloat16 is a number between 1E385 and

-1E-383 for a negative number, 0, and 1E-383 to 1E385 for a positive number.

A. True

B. False

Answer: A

NO.70 A replacement object can be defined for a pooled table.

A. True

B. False

Answer: B

NO.71 Which screen in the ABAP Dictionary allows you to log data changes to the table?

A. Delivery and Maintenance tab

B. Attributes tab

C. Utilities * Database Object * Database Utility

D. Technical Settings

E. Utilities * Settings

Answer: D

NO.72 FORM routines (subroutines) can be used in which program types? Select all that apply

A. Module pools

B. Executables

C. Function groups

D. Class pools

E. Subroutine pools

F. Interface pools

G. Type groups

Answer: A B C E

NO.73 Identify the types of controller. Select all that apply.

A. Consumer controller

B. View controller

C. Window controller

D. Component controller

E. Custom controller

F. Configuration controller

Answer: B C D E F

NO.74 (F1) help on the screen field displays the data element documentation

A. True

B. False

Answer: A

NO.75 The FIELD statement does not have any effect in the PBO event block, and it should not be used in the PBO event block.

A. True

B. False

Answer: A

NO.76 The predefined data types are defined locally in the ABAP program.

A. True

B. False

Answer: B

NO.77 An internal table can have primary keys as well as secondary keys.

A. True

B. False

Answer: A

NO.78 It is recommended that you place the COMMIT WORK in the update task.

A. True

B. False

Answer: B

NO.79 The order of fields for a transparent table in the database...

A. Is created in the order of the ABAP Dictionary

B. Needs to match the ABAP Dictionary.

C. Is allowed to be different than the ABAP Dictionary.

Answer: C

NO.80 You can create projection views for pooled or cluster tables

A. False

B. True

Answer: B

NO.81 You can maintain SAPscript forms and SAP Smart Forms within the ABAP Workbench.

A. True

B. False

Answer: B

NO.82 Which statements are considered obsolete and cannot be used in ABAP Objects? Select all that apply. (S. 556)

{9 Richtig}

A. DATA - BEGIN OF ... OCCURS

B. RANGES

C. LOOPATdbtab

D. LEAVE

E. GE OF

F. INFOTYPES s/ TABLES

G. SEARCH

H. DATA - 1YPE - OCCURS

Answer: A B C D E F G H

NO.83 What is the ALV Object Model?

A. A group of hierarchal classes that describe the ALV Grid as a whole but do not inherit from a single class

B. A group of classes that describe the ALV Grid as a whole and inherit from a single class

Answer: A

NO.84 Object or class events can trigger any number of handler methods.

A. True

B. False

Answer: A

NO.85 Nested source code enhancement allows you to enhance the source code plug-in.

A. True

B. False

Answer: A

NO.86 ABAP now has predefined functions that behave like functional methods.
A. FALSE
B. TRUE
Answer: B

NO.87 What does a view do? Select all that apply.
A. Contains windows
B. Contains other views
C. Contains a view controller
D. Can be contained in a window
E. If entered by an inbound plug, can cause an event handler method to be
Answer: A C D E

NO.88 The FIELD statement with the ON REQUEST addition calls the ABAP dialog module if any value is entered in the screen field.
A. True
B. False
Answer: A

NO.89 There can only be one level in the inheritance tree
A. True
B. False
Answer: B

NO.90 The static sequence of the default next screen can be established by the value in the screen attribute Next Screen.
A. False
B. True
Answer: B

NO.91 Two structures in Unicode programs are only compatible if all alignment gaps are identical on all platforms.
A. True
B. False
Answer: A

NO.92 The line type for a table type can contain a flat, nested, or deep structure.
A. False
B. True
Answer: B

NO.93 What is the allowed length of the ABAP Dictionary data type DF34_RAW?

A. The allowed length is between 1 and 34 digits.

B. The allowed length is 34 digits.

C. The allowed length is between 1 and 31 digits

D. The allowed length is between 0 and 33 digits.

Answer: B

NO.94 Declaration of an internal table with a header line can be used in a class implementation.

A. True

B. False

Answer: B

NO.95 The user interface consists of the GUI status and GUI title.

A. True

B. False

Answer: A

NO.96 There are_____versions of the ABAP Editor.

A. 2

B. 4

C. 3

Answer: C

NO.97 You can list a maximum of six browsers in the Object Navigator. (S. 105) {1 Richtig}

A. True

B. False

Answer: B

NO.98 With what can you simulate multiple inheritance?

A. INTERFACES

B. REDEFINITION

C. INHERITING FROM

Answer: A

NO.99 How many kinds of internal tables are supported in the ABAP language?

A. 2

B. 1

C. 3

Answer: C

NO.100 Which class is used to define a reference for an instance of the ALV Object Model?

A. Class CL_GUI_ALV_GRID

B. Class CL_GUI_CUSTOM_CONTAINER

C. Class CL_SALV_TABLE

Answer: C

NO.101 You cannot use a SORT statement for a sorted internal table.
A. False
B. True
Answer: B

NO.102 At most, how many buttons can the application toolbar have on the screen?
A. 20
B. None of the above
C. 35
D. 10
E. 30
Answer: C

NO.103 Which of the following is correct?
A. The screen attributes can be modified in the PROCESS BEFORE OUTPUT event block.
B. None of the above
C. The screen attributes can be modified in the PROCESS AFTER INPUT even block.
D. The screen attributes can be modified in the PROCESS BEFORE OUTPUT and PROCESS AFTER INPUT event blocks.
Answer: A

NO.104 The data is transferred and displayed on the screen after the processing of the PBO.
A. True
B. False
Answer: A

NO.105 If a user has an object locked in a task within a request (transport), then no one else can change it until the task and request are released.
A. True
B. False
Answer: B

NO.106 Subclasses can access the private components of the parent class.
A. True
B. False
Answer: B

NO.107 ABAP data types can be used for a domain definition.
A. True
B. False
Answer: B

NO.108 What is the difference between a value table and a check table?

A. A check table is defined in the domain, whereas a value table is defined in '-' the data element

B. A value table is defined in the domain, whereas a check table is defined in '-' the data element.

C. A value table is a check table after a foreign key is defined

D. No difference; they are the same thing.

E. A value table does not exist

Answer: C

NO.109 When must a foreign key have domain equality?

A. For a text table

B. Always

C. For a check field

D. Never

Answer: C

NO.110 Lock objects are only required when doing dialog programming; SAP's best practice does not require them when doing background or en masse changes, as there is no COMMIT WORK that will occur.

A. False

B. True

Answer: A

NO.111 Data types store data and occupy memory.

A. True

B. False

Answer: B

NO.112 What is the Web Dynpro programming model is based on?

A. Classic Dynpro programming

B. Model View Controller (MVC)

C. Business Server Pages (BSPs)

D. Internet Transaction Server (ITS)

Answer: B

NO.113 The target structure of a SELECT statement requires the field names to match the columns selected and to be in the same left-justified order.

A. False

B. True

Answer: A

NO.114 What is the maximum number of watchpoints that can exist at one time?

A. No limit

B. 8

C. 10
D. 16
Answer: C

NO.115 Which types of programs or parts of programs can be tested directly from the ABAP Workbench or ABAP Editor? Select all that apply
A. INTERFACE-POOL
B. TYPE-POOL
C. PROGRAM
D. METHOD
E. INCLUDE
F. FUNCTION-POOL
G. FUNCTION MODULE
H. CLASS-POOL
I. REPORT
Answer: D G H I

NO.116 If data objects of type I are being used to store the result of a calculation, the decimals will be truncated.
A. True
B. False
Answer: B

NO.117 Open SQL does not allow you to specify a secondary index during a SELECT.
A. True
B. False
Answer: A

NO.118 Which modularization units can raise an exception? Select all that apply
A. Methods
B. Subroutines (FORM routines)
C. Function modules
Answer: A B C

NO.119 Which of the following statements are true? Select all that apply.
A. A conversion routine can be assigned to a domain.
B. A conversion routine can be assigned to a data element.
C. You define the value range in the data element.
D. You can enter documentation for the data element in the ABAP Dictionary.
Answer: A D

NO.120 Only one text table can be linked to a table.
A. True

B. False

Answer: A

NO.121 What is the result of the following arithmetic operation?

DATA: int TYPE I.

int = 5*(3/10).{1 Richtig}

A. 1

B. D2

C. 1.5

D. 0

Answer: D

NO.122 Which of the following are incorrect statements? Select all that apply.

A. TYPES: carridjy LIKE spfli-s-carrjd.

B. TYPES: werks TYPE C LENGTH 4.

C. TYPES: datejy TYPE D LENGTH 10.

D. TYPES: Str TYPE STRING LENGTH 20.

Answer: C D

NO.123 V1 update tasks are always non-restartable, whereas V2 update tasks are always restartable.

A. True

B. False

Answer: B

NO.124 Which actions release a database lock? Select all that apply.

A. The display of an SAP screen

B. ROLLBACK WORK

C. ENQUEUE_<lock_object>

D. An/n in the command field

E. COMMIT WORK

F. The display of a dialog message type E

G. A Submit

H. A CALL TRANSACTION

I. A SUBMIT (Sepeperat)

J. A call to a function module

K. The display of a dialog message type A

Answer: A B D E F G H K

NO.125 It is not possible to test a function module if another function module of the same function group contains a syntax error.

A. False

B. True

Answer: B

NO.126 Which of the following statements are true? Select all that apply.
A. maintenance view is implemented as an outer join.
B. A database view is implemented as an outer join.
C. database view is implemented as an inner join.
D. A maintenance view is implemented as an inner join.
Answer: A C

NO.127 Setting breakpoints for a method or function module within the Debugger allows the use of (F4) (value help) to find the correct name.
A. True
B. False
Answer: A

NO.128 You can empty the body of the internal table itab with a header line using the CLEAR itab statement.
A. True
B. False
Answer: B

NO.129 An internal table line type with a deep or nested structure can be defined for internal tables with a header line.
A. True
B. False
Answer: B

NO.130 If you enter the value "0" or blank ("") as the next screen, then the system resumes processing from the point at which the screen was initiated, assuming the Next Screen attribute is overridden dynamically in the program.
A. True
B. False
Answer: A

NO.131 A development object can be assigned to only one package
A. False
B. True
Answer: B

NO.132 What is the default selection screen number for the ABAP program?
A. 1100
B. None of the above
C. 1000
D. 100

Answer: C

NO.133 Code within an explicit enhancement section can be replaced by the customer.
A. False
B. True
Answer: B

NO.134 Which you should specify in a non-Unicode system when opening a file in TEXT MODE?
Select all that apply.
A. The ENCODING addition
B. The byte order
C. The code page
Answer: B C

NO.135 The Debugger displays a maximum of eight data objects at one time.
A. True
B. False
Answer: A

NO.136 Internal tables cannot have a deep or nested structure in their line type
A. False
B. True
Answer: A

NO.137 The Repository Information System is a useful tool to search for customer exits/function exits and BAdls in the SAP system.
A. True
B. False
Answer: A

NO.138 Beginning with SAP NetWeaver 7.40, if SAP HANA (an in-memory database) is being used as a database, then table buffering is no longer effective and is therefore not possible.
A. True
B. False
Answer: B

NO.139 Buffering data can speed access to data up to 100 times when compared to reading it from the database.
A. False
B. True
Answer: B

NO.140 How many work areas are available in the Debugger?
A. 12

B. 15

C. 7

D. 9

Answer: A

NO.141 Private components of the class cannot be addressed directly from outside the class except when the friendship concept applies

A. False

B. True

Answer: B

NO.142 It is possible to make multiple changes to data objects at the same time in the Debugger

A. False

B. True

Answer: B

NO.143 To reserve an area on the screen for an ALV Grid Control, you must do the following:

A. Use the Screen Painter

B. Create an object (instantiate the object) of the class CL_GUI_CUSTOM_CONTAINER

C. Create an object (instantiate the object) of the class CL_GUI_ALV_GRID

D. Create an object (instantiate the object) of the class CL_SALV_TABLE

Answer: A

NO.144 Global data types defined in SAP systems are...

A. ABAP Dictionary types.

B. Data defined in the program that is visible to all the routines/statements '-' within the ABAP program.

C. Date types defined in the program using ABAP Dictionary types.

Answer: A

NO.145 Public methods can access the private attributes of the same class.

A. True

B. False

Answer: A

NO.146 Which of the following regarding search helps is a true statement? Select all that apply.

A. The interface for the search help is defined by the IMP (import) and EXP '-' (export) flags of the search help parameter

B. The LPos parameter defines the position of the search help parameter in the '-' search hit list.

C. The text table for the selection method is automatically populated if the text table is attached to the database table being used as the selection method.

D. The SPos parameter defines the position of the input field on the dialog '-' screen.

Answer: A B C D

NO.147 When starting the Debugger, what circumstance causes the runtime error DEBUGGING_NOT_POSSIBLE?

A. When the number of debugging sessions on the server exceeds the value '-' defined by the profile parameter rdisp/wpdbug_max_no

B. Starting a non-exclusive mode in a productive system

C. When more than five sessions are already associated with this login user

Answer: B

NO.148 Where are fixed values for fields stored?

A. Field

B. Structure

C. Table \/ Q Domain

D. Data element

Answer: D

NO.149 Which modularization units are global? Select all that apply

A. Function modules

B. Subroutines (FORM routines)

C. Methods within a local class in the program

D. Methods within class pools

Answer: A D

NO.150 Which elementary field types are considered a character type? Select all that apply.

A. N

B. X

C. F

D. C

E. I

F. STRING

G. XSTRING

H. T

I. D

Answer: A D F H

NO.151 What does Software Layer Aware Debugging allow you to do? Select all that apply.

A. Trace executing cod

B. Debug only a small portion of code

C. Bypass authorization objects

D. Debug a large portion of code

E. Specify as much or as little code to debug

Answer: B D E

NO.152 An internal table is an ABAP program variable.

A. False
B. True
Answer: B

NO.153 Update tasks are the only way to make changes to the database
A. False
B. True
Answer: A

NO.154 If an error or warning message is sent from the ABAP dialog module for the FIELD statement within the CHAIN and ENDCHAIN statements, then all of the fields within CHAIN and ENDCHAIN are ready for user input again. (S. 411) {1 Richtig}
A. False
B. True
Answer: B

NO.155 Customer exits provide program exit, screen exit, and menu exit enhancements.
A. True
B. False
Answer: A

NO.156 What does the enhancement category for a database table or structure do? Select all that apply.
A. Specifies the types of changes that can be made to the structure
B. Can produce warnings at incompatible points for the structure
C. Can identify where program behavior may change
D. Makes a table Unicode-compliant
Answer: A B C

NO.157 You use the addition OBLIGATORY to define the input field of a parameter as a required field.
A. True
B. False
Answer: A

NO.158 Which of the following statements regarding search helps are true? Select all that apply.
A. You can use a database view for the search help selection method.
B. You can use transparent tables for the search help selection method.
C. You can use a maintenance view for the search help selection method.
D. Help views can also be used for the selection method for search help.
Answer: A B D

NO.159 In addition to the visible part (the layout), a view also contains a controller and a context
A. True

B. False

Answer: A

NO.160 Which of the following statements are correct? Select all that apply (S. 470) {4 Richtig}

A. You can call private methods within the public methods without reference ^ '-' to the object or class.

B. None of the above

C. Static methods can be defined in both the public and private visibility section of the class.

D. Class methods assigned to the public visibility section can be accessed outside the class using the static component selector and the class name.

E. Only public methods can be addressed outside the class.

Answer: A C D E

NO.161 If you are using external debugging (debugging of HTTP and RFC requests, which arrive in your ABAP system), what will the Debugger do?

A. May or may not stop, depending on external factors.

B. Always stop when the external breakpoint is reached.

C. Never stop; external breakpoints operate on users other than your own.

Answer: A

NO.162 Under which circumstances will the classic Debugger start as the Debugger?

A. None; the new Debugger will always start as the Debugger

B. When the number of debugging sessions exceeds half the number of dialog '-' sessions.

C. If you manually switched to the classic Debugger during your last session

D. When you specify the default as the classic Debugger in the settings of the ^ '-' Object Navigator.

E. When five modes already exist for this logon session.

Answer: D E

NO.163 Which of the following statements are true? Select all that apply

A. Projection views can have more than one table included for the view definition.

B. You cannot use a pooled or cluster table for a database view.

C. The tables included in the maintenance view should have foreign key relationships.

D. The tables included in the help view should have foreign key relationships.

Answer: A B C

NO.164 Methods provide which types of parameters? Select all that apply.

A. Output

B. Return values

C. Input

D. Input/output (changing)

E. Exceptions

Answer: A B C D E

NO.165 In the CALL CUSTOMER-FUNCTION 'nnn' statement, nnn is a three-digit number used in SAP programs for which of the following types of enhancement?

A. Customer exits

B. User exits

C. Business add-ins

D. New BAdIs

Answer: A

NO.166 What must you specify in a Unicode system when opening a file in TEXT MODE?

A. The byte order

B. The ENCODING addition

C. The code page

Answer: B

NO.167 When does the lifetime of a component controller begin and end? (S. 530) {1 Richtig}

A. It begins with the Web Dynpro component and ends with the Web Dynpro application that called it

B. It lasts from creating data within the controller to cover the whole period' during which the component is in use.

C. It begins the first time the Web Dynpro application is called at runtime and ends when the Web Dynpro application that called and instantiated the component ends.

Answer: B

NO.168 What is unique about a singleton? Select all that apply.

A. It must be instantiated using a private instance constructor

B. It must be instantiated using a protected instance constructor

C. It must be instantiated using a static protected constructor

D. It must be defined as FINAL

E. It must be instantiated using a public instance constructor

F. It cannot be defined as FINAL.

G. It must be instantiated using a static private constructor

H. It must be instantiated using a static public constructor

Answer: D G

NO.169 Which statements about ABAP are true?

A. ABAP keywords and additions must be in uppercase.

B. Each statement must begin with a keyword

C. Each statement must end with a period.

Answer: C

NO.170 Local update tasks are quicker because they stay within the same work process.

A. False

B. True

Answer: A

NO.171 Which events can exist in all types of programs that actually contain executable statements?
A. AT USER-COMMAND
B. AT PF##
C. INITIALIZATION
D. LOAD-OF-PROGRAM
E. AT LINE-SELECTION
F. START-OF-SELECTION
Answer: D

NO.172 Each button on a Dynpro (screen) requires the assignment of a function code. This function code...
A. Can be used to identify when the button is clicked by looking for the function code in the screen's OK_CODE *-I field.
B. Is used to define global variables that receive a value when the button is '-' clicked.
C. Prevents the function code from be assigned to a menu item.
Answer: A

NO.173 Which of the following standard types is numeric? Select all that apply.
A. P
B. I
C. Decfloat32
D. F
Answer: A B D

NO.174 You should always buffer database tables that contain fewer than 100 records.
A. False
B. True
Answer: A

NO.175 You can have only one selection screen for an ABAP program. (S. 436) {1 Richtig}
A. False
B. True
Answer: A

NO.176 The Debugger is entirely self-contained and requires no external transactions.
A. True
B. False
Answer: B

NO.177 What character is used as a symbol for the operand type in an expression?
A. None of the above

B. @

C. #

D. ~

Answer: C

NO.178 In which circumstances is a table considered to be a text table? Select all that apply

A. The entire key of this data table is included as the key to this table.

B. This table only has one character-based data field.

C. This table has a foreign key to the data table as a text table.

D. This table has an additional language key field.

E. The ABAP runtime system determines that the relationship exists.

Answer: A C D

NO.179 What is the difference between SAP Basis and SAP NetWeaver?

A. There is no difference; the name change was driven by marketing alone.

B. All versions of SAP NetWeaver include the ability to handle HTTP requests.

C. All versions of SAP NetWeaver require the use of Unicode.

Answer: B

NO.180 Which does the field catalog allow you to do? Select all that apply. (S. 503) {3 Richtig}

A. Change the display order of a column

B. Change the title of a column

C. Produce a striped pattern for the display lines

D. Add a field to the display

E. Specify the sort order of the display table

Answer: A B D

NO.181 The Next Screen attribute can be temporarily overwritten by the set screen statement (that is, SET SCREEN

200).

A. False

B. True

Answer: B

NO.182 What does a Web Dynpro component contain? Select all that apply.

A. A context

B. Exactly one interface controller

C. UI elements

D. Multiple views within a window

E. Component controller

Answer: B D E

NO.183 Value help can be supplied from which of the following?

Please select all the correct answers that apply.

Response:

A. Fixed values

B. Search help for a screen field

C. Search help for table or structure fields

D. Key values of a check table

E. Search help for a check table

F. Search help from a text table

G. Process On Value request

H. Search help for a data element

Answer: A B C D E F G H

NO.184 What is the difference between a Unicode and non-Unicode program? Select all that apply

A. Offset positioning in a Unicode structure is restricted to flat data objects.

B. Byte-type data objects cannot be assigned to character-type data objects.

C. Offset positioning in a Unicode structure is restricted to character data ^ *-I objects.

**D.** Byte-type data objects cannot be compared to character-type data objects.

Answer: A B C D

NO.185 Dynpros can be placed in which program types? Select all that apply.

A. Module pools

B. Function groups

C. Class pools

D. Executables

Answer: A B D

NO.186 Given the code in the exhibit (see Figure 17.9) and the knowledge that both lcl_truck and lcl_car inherit from lcl_vehicle, which statements are true? Select all that apply

A. The code will produce a runtime error.

B. The code shows two valid up casts.

C. The table lt_vehicle contains three vehicles.

D. The code is not syntactically correct.

E. The code shows no valid up casts.

F. The code shows three valid up casts.

Answer: A B C

NO.187 It is possible to PERFORM <subroutine> ON COMMIT in an update task.

A. True

B. False

Answer: A

NO.188 At most, how many menu items (including functions, separators and submenus) can a menu have on the screen?

A. 10

B. 20

C. 15

D. None of the above

Answer: C

NO.189 ABAP Push Channels (APC) can only use the WebSocket protocol.

A. False

B. True

Answer: A

NO.190 Which statement will interrupt the processing of the current screen and branch to new screen?

A. LEAVE TO SCREEN <NNNN>

B. SET SCREEN <NNNN>

C. None of the above

D. CALL SCREEN <NNNN>

Answer: D

NO.191 Each ABAP program starts with an introductory statement. Which statements are correct? Select all that apply.

A. The introductory statement must be the first line in the program

B. The introductory statement can be modified.

C. The introductory statement must be the first statement in the program.

D. The introductory statement must never be modified.

Answer: B C

NO.192 Where do you create online documentation ((F1) help) for fields on the screen?

A. Table

B. Domain

C. Structure

D. Data element

E. Field

Answer: D

NO.193 The binding between a UI element and a context attribute is a two-way relationship

A. True

B. False

Answer: A

NO.194 Which of the following statements are true? Select all that apply. (S. 470) {2 Richtig}

A. Static attributes are declared with the CLASS-DATA statement.

B. A static attribute is the same across all instances of the class. There is only one static attribute across all instances of the class.

C. Static attributes cannot be changed by an object.

D. Static attributes can be declared only in the private visibility section of the class

Answer: A B

NO.195 Each ABAP program that actually contains executable statements... (Select all that apply.)

A. Assigns every executable statement to a processing block regardless of it ^ '-' being in a processing block.

B. Only assigns executable statements in a processing block to a processing *-I block

C. Has declarative statements outside of processing blocks that are considered *-I local

D. Uses event blocks to trigger events in ABAP.

E. Has declarative statements inside of processing blocks that are considered *-I local

F. Is divided into processing blocks.

G. Can be tested from the ABAP Workbench by pressing (F8)

Answer: A F

NO.196 Which statements are true regarding ABAP inheritance? Select all that apply.

A. The static constructor can be overwritten as part of inheritance.

B. You can access the superclass component with the prefix SUPER->.

C. Overloading allows a method to have several definitions with different signatures.

D. Polymorphism requires the developer to specify which method to use with inheritance.

E. The instance constructor can be overwritten as part of inheritance.

F. Static constructors do not need to call the superclass's constructor

G. Instance constructors must call the superclass's constructor.

Answer: B E F G

NO.197 The ALV is entirely implemented using ABAP Objects.

A. False

B. True

Answer: A

NO.198 All breakpoints are valid for the entire Debugger session, and all can be changed by the Debugger

A. False

B. True

Answer: B

NO.199 The ABAP Messaging Channels (AMC) uses the WebSocket protocol to gain two-way communication instead of HTTP.

A. True

B. False

Answer: B

NO.200 What are the differences between displaying in a full screen and in a container? Select all that apply. (S. 503)

{2 Richtig}

A. Only a full-screen ALV allows the use of event handling.

B. The full screen requires Dynpro programming.

C. Only an ALV in a container allows the use of event handling

D. Any type of ALV allows the use of event handling.

E. The only difference is that the container name must be specified when creating the ALV object.

F. The container requires the use of an additional object (a container control).

Answer: D F

NO.201 The READ statement with the addition BINARY SEARCH for a sorted internal table is better for performance.

A. False

B. True

Answer: A

NO.202 Is it possible to have multiple active implementations of business add-ins at a time? Select all that apply

A. It can have multiple active implementations if the Multiple use checkbox is '-' selected.

B. It cannot have a multiple active implementation.

C. It can have multiple implementations if the Filter-Depend, checkbox is '-' selected.

Answer: A C

NO.203 Which must a search help do? Select all that apply.

A. Determine the values for selection by the user

B. sed from a screen

C. Use a table or a view for data selection

D. Have a dialog with the user

E. Allow the user to select a response

Answer: A B D E

NO.204 Which of the following is a true statement? Select all that apply

A. A package can be nested.

B. All customer repository objects have to be assigned to a package.

C. Packages use interfaces and visibility to make their elements visible to other packages.

D. The transport layer is a mandatory input field for the package

Answer: A B C

NO.205 A view can only be displayed in which circumstances?

A. It contains an inbound and outbound plug

B. It can always be displayed.

C. It has been embedded in a window.

Answer: C

NO.206 Which statement cannot use a subquery.

A. None of the above

B. SELECT

C. INSERT

D. DELETE

E. UPDATE

Answer: B D E

NO.207 What does the Refactoring Assistant allow you to do? Select all that apply.

A. Move components between superclasses and subclasses

B. Move between classes and interfaces

C. Rename all occurrences of a method

Answer: A B

NO.208 The Java stack and the ABAP stack of an SAP NetWeaver Application Server must always be installed together

A. False

B. True

Answer: A

NO.209 The constructor method is always defined in the private visibility section of the class.

A. True

B. False

Answer: B

NO.210 The database always uses the primary key when the WHERE clause contains any of the key fields.

A. False

B. True

Answer: A

NO.211 What is the correct order for using a lock object?

A. Read the data, set the lock, change the data, release the lock

B. Set the lock, read the data, change the data, release the lock

C. Set the lock, read the data, release the lock, change the data

Answer: B

NO.212 A change request is part of a task.

A. True

B. False

Answer: B

NO.213 The READ-ONLY addition for the attribute declaration can be used in the private and public visibility section.

A. True

B. False

Answer: B

NO.214 Your selection screen can be modified at which event?

A. AT SELECTION-SCREEN OUTPUT

B. AT SELECTION-SCREEN

C. None of the above

D. AT SELECTION-SCREEN ON <field_name>

Answer: A

NO.215 Protected attributes can be accessed by methods of the class and its subclasses.

A. True

B. False

Answer: A

NO.216 Which statement is true?

A. An SAP LUW must be placed within a database LUW.

B. A database LUW must be placed within an SAP LUW.

Answer: A

NO.217 It is possible to use both buffering and secondary indexes to improve performance of a search help.

A. True

B. False

Answer: A

NO.218 You use the CREATE OBJECT statement to create both types of ALV.

A. False

B. True
Answer: A

NO.219 The _WAIT parameter of a lock object waits for the lock to be successful.
A. False
B. True
Answer: A

NO.220 The constructor method is called automatically when you create an instance of the class.
A. True
B. False
Answer: A

NO.221 You can define multiple elements in a single line by defining the element within the block SELECTION-SCREEN BEGIN OF LINE and SELECTION-SCREEN END OF LINE.
A. False
B. True
Answer: B

NO.222 An internal table can be defined using the DATA statement.
A. False
B. True
Answer: B

NO.223 You can use the logical expression IS SUPPLIED for any formal parameter passed to which modularization unit? Select all that apply.
A. Instance method
B. Subroutine (FORM routine)
C. Function module
D. Static method
Answer: A C D

NO.224 What is the allowed length of the ABAP Dictionary data type DF16_DEC?
A. The allowed length is between 0 and 15 digits.
B. The allowed length is between 0 and 16 digits.
C. The allowed length is between 1 and 15 digits
D. The allowed length is 16 digits.
Answer: C

NO.225 Which message types behave the same regardless of the context in which they are called? Select all that apply
A. S
B. I

C. W

D. A

E. X

F. E

Answer: D E

NO.226 The system class CL_ABAP_MATH contains constants for maximum and minimum values for the numeric data type

A. True

B. False

Answer: A

NO.227 ABAP is a programming language that... (Select all that apply.)

A. Processes and formats data.

B. Interacts with the user.

C. Controls the business logic.

D. Separates program code from language text.

E. Executes on all three levels of the three-tier architecture

Answer: A B C D

NO.228 Database access can occupy most of the runtime in an ABAP program. Which tools are available to assist you to diagnose performance issues in your program? Select all that apply}

A. ABAP Objects Runtime Analysis (Transaction ATRA)

B. Performance Trace (Transaction ST05)

C. ABAP Trace (Transaction SAT)

D. ABAP Objects Runtime Analysis (Transaction SE30)

Answer: A B C D

NO.229 Local data objects can be defined using ABAP Dictionary types

A. False

B. True

Answer: B

NO.230 The FIELD statement with the ON INPUT addition is used to conditionally call the ABAP dialog module. The ABAP dialog module is called if the value of the screen field is other than the initial value. (S. 411) {1 Richtig}

A. True

B. False

Answer: A

NO.231 What type of ABAP Dictionary view is implemented as an INNER JOIN?

Please choose the correct answer.

Response:

A. Database view

B. Projection view

C. Help view

D. Maintenance view

Answer: A

NO.232 Which statements are true? Select all that apply.

A. The ALV Object Model requires a table refresh after programmatically changing the ALV

B. The ALV Grid can define a sort criteria for initial display.

C. The ALV Object Model uses a reference to the data table for display.

D. The ALV Object Model can define a sort criteria for initial display.

E. The ALV Grid uses a reference to the data table for display.

F. The ALV Grid requires a table refresh after programmatically changing the DALV.

Answer: B C D E F

NO.233 Which of the following statements are correct? Select all that apply.

A. An enhancement spot can contain an explicit enhancement point, explicit '-' enhancement section, and new BAdI.

B. An enhancement spot can contain either an explicit enhancement point and enhancement section or a new BAdI only, but all three cannot be in the same enhancement spot.

C. An enhancement spot can contain one or more simple or composite '-' enhancements.

D. An enhancement spot can contain an explicit enhancement point and an enhancement section.

Answer: B C D

NO.234 You can call a module for the FIELD statement to validate user entry on the input field. You can validate the entry on the input field and send an error or a warning message from an ABAP dialog module.

A. False

B. True

Answer: B

NO.235 You can define a selection screen as a subscreen or tab strip control.

A. True

B. False

Answer: B

NO.236 ABAP Unit Test Browser is included in Object Navigator with SAP NetWeaver 7.0 EHP 2.

A. False

B. True

Answer: B

NO.237 The Object Navigator incorporates a total of 11 browsers.

A. False

B. True

Answer: B

NO.238 The statements CALL BADI and GET BADI are used for which type of BAdls?

A. Classical BAdl

B. None of the above

C. New BAdl

Answer: C

NO.239 Which of the following statements are true? Select all that apply. (S.596) {3 Richtig}

A. Implicit enhancement options allow you to enhance interface parameters for function modules and methods without modifying the repository object.

B. An implicit enhancement point can be used to insert code in an SAP program and is always available to the customer.

C. None of the above.

D. Implicit enhancement can be used to enhance SAP objects developed prior to SAP NetWeaver 7.0.

Answer: A B D

NO.240 Both the classic Debugger and the new Debugger can be used on all ABAP code without restriction.

A. False

B. True

Answer: A

NO.241 The Repository Browser is started by default when you execute Transaction SE80 for the Object Navigator

A. True

B. False

Answer: A

NO.242 The READ statement with the BINARY SEARCH addition cannot be used for a sorted internal table.

A. False

B. True

Answer: A

NO.243 Which of the following are true statements? Select all that apply

A. Table fields can be assigned to a data element.

B. A reference table and field are required for fields with the data types QUAN *-I and CURR

C. Search helps can be defined for a table field that is assigned to a predefined '-' data type

D. Table fields can be assigned to an ABAP Dictionary data type directly.

Answer: A B D

NO.244 What is the best order to provide an event handler for an ALV?

A. Create the ALV, write the handler, register for the event, display the ALV

B. Write the handler, register for the event, create the ALV, display the ALV

C. Write the handler, create the ALV, display the ALV, register for the event

D. Register for the event, write the handler, create the ALV, display the ALV

E. Write the handler, create the ALV, register for the event, display the ALV

Answer: E

NO.245 Which of the following is a true statement? Select all that apply.

A. An access key is required to enhance an SAP application using a user exit.

B. An access key is required to implement an implicit enhancement point.

C. An access key is required to modify SAP repository objects.

D. An access key is required to implement business add-ins.

Answer: A C

NO.246 Memory requirements are identical in a non-Unicode system and in a Unicode system.

A. True

B. False

Answer: B

NO.247 Function modules provide which types of parameters? Select all that apply.

A. Return values

B. Output

C. Exceptions

D. Input

E. Input/output (changing)

Answer: B C D E

NO.248 You can modify an internal table by using the UPDATE statement

A. False

B. True

Answer: A

NO.249 What is the result of the following arithmetic operation?

DATA: int TYPE I int = 5 /10 {1 Richtig}

A. 0

B. 5

C. 1

Answer: C

NO.250 Each ABAP program starts with an introductory statement. Which statements are correct? Select all that apply.

A. The introductory statement must be the first statement in the program.

B. The introductory statement must be the first line in the program

C. The introductory statement can be modified.

D. The introductory statement must never be modified.

Answer: B C

NO.251 A work process...

A. Becomes inactive while waiting for a user

B. Stays linked to a screen through the dispatcher

C. Uses a common memory area called shared memory

Answer: C

NO.252 The addition NO-INTERVALS for SELECT-OPTIONS will allow only single fields on the selection screen.

A. True

B. False

Answer: A
